

Master List of Recommendations /Actions Master List (As Amended 2024)

Headings in black boxes describe the purpose / thrust of the action to be given to the user. Only text in white boxes is provided to the users.

Where this categorisation of criteria is in a green box, it is proposed that all users would receive this type of action in one of the categories listed.

Where the criteria are in an orange box, users would only receive recommended actions if they're in one of the categories/ sectors referenced.

Each Action is assigned a priority:

Get Started
Embed
Strategic

Each Action is assigned relevant focus area buttons:

Energy
Water
Travel
Materials
Training/ Staff Engagement
Cost Saving
High Impact
Supports

Recommended Actions Master List

1. Give this plan an owner		
Size	Size	Size
10 or fewer	11 -249	250 or more
<p>Appoint a key member of staff to be your sustainability champion.</p> <p>Your sustainability champion will take ownership of this plan, share it with all staff and set an ambitious but achievable timeframe for putting these measures in place.</p>	<p>Appoint a small number of key staff across the business to be a 'Green Team', with an appointed leader.</p> <p>Your Green Team, with oversight of a member of the senior management team, will take ownership of this plan, share it</p>	<p>Appoint a senior manager as your sustainability lead, with access to the necessary resources and perhaps a 'Green Team' of colleagues throughout the organization.</p> <p>Your Sustainability lead and Green Team, with oversight of a</p>

2. Undertake Energy Training – provide training to staff to reduce energy use.		
Size	Size	Size
10 or fewer	11 -249	250 or more
<p>All appropriate staff should do an online energy training course to identify energy and cost savings for your business.</p> <p>Completing an e-learning course on SEAI’s Energy Academy will enable staff to reduce your business’ energy consumption and save money on your energy bills.</p> <p><u>Supports Available & Description</u></p> <p>The SEAI Energy Academy is a free online training resource offering modules focused on important areas of energy efficiency and management. https://www.seai.ie/energyacademy/</p> <p>Assess whether there is a Solas green microqualification that your staff could undertake to help your business achieve its climate goals. https://www.solas.ie/programmes/skills-to-advance/employers/</p>	<p>All appropriate staff should do an energy training course to identify energy and cost savings for your business.</p> <p>Arrange for your Green Team and other relevant staff to undertake Energy Management training with SEAI or Skillnet Ireland. By changing behaviours within the workplace, businesses can lower operating costs while reducing energy intensity, which is vital for combatting climate change.</p> <p><u>Supports Available & Description</u></p> <p>The SEAI Energy Academy is a free online training resource offering modules focused on important areas of energy efficiency and management. https://www.seai.ie/energyacademy/</p> <p>The Climate Ready Academy Energy Leaders Programme equips businesses and energy professionals with expertise on how to reduce energy waste, optimise cost savings, and protect the environment. https://climateready.academy.ie/energy-leaders-programme/</p> <p>The Climate Ready Academy Sustainability Leaders programme aims to drive and assist businesses and sustainability professionals to embrace responsible and sustainable business practices towards a decarbonized economy. https://climateacademy.ie/sustainability-leaders-programme</p> <p>Assess whether there is a Solas green microqualification that your staff could undertake to help your business achieve its climate goals. https://www.solas.ie/programmes/skills-to-advance/employers/</p>	<p>Key management and all appropriate staff should undertake energy training to identify opportunities for further energy and cost savings for your business.</p> <p>Your Sustainability lead should undertake regular specialist training to identify energy and cost efficiencies. Arrange for staff and Green Team to undertake Energy Management training with SEAI or Skillnet Ireland. By changing awareness and knowledge within the workplace, businesses can lower operating costs while reducing energy intensity.</p> <p><u>Supports Available & Description</u></p> <p>The SEAI Energy Academy is a free online training resource offering modules focused on important areas of energy efficiency and management. https://www.seai.ie/energyacademy/</p> <p>Climate Ready Academy Energy Leaders Programme equips energy professionals with expertise on how to reduce energy waste, optimise cost savings, and protect the environment. https://www.climateready.academy.ie/energy-leaders-programme/</p> <p>Assess whether there is a Solas green microqualification that your staff could undertake to help your business achieve its climate goals. https://www.solas.ie/programmes/skills-to-advance/employers/</p>

3. Understand, monitor and reduce your energy use by increasing energy awareness and encouraging behavioural change.

All Users

Monitor and reduce your energy use, through increasing energy awareness and encouraging behavioral change amongst staff.

Recording energy use gives you a baseline against which to measure all improvement actions taken. SEAI's Energy Management Guide for Small Business can be a useful guide to getting started with monitoring your energy use.

Use communications tools to promote awareness and support staff to be more energy efficient

Communications will include:

- Posters and/or other prominent messages in the workplace to let staff know about the energy saving and conservation measures.
- Regular communication on the energy and emissions footprint of the organisation and the steps underway to address these.
- Cues to remind staff to turn off lights and equipment at the end of the day/when not required.
- Appointing someone to turn off communal machines like printers, coffee machines, etc. at appropriate times.
- Energy saving competitions between departments or teams.
- Encouraging all staff to undertake online sustainability training (training recommendations provided in further actions)
- Consider assigning sustainability objectives, goals and actions as part of your performance management process.

Supports Available & Description

SEAI Introduction to Energy Management: Creating an Energy Action Plan Training assists businesses with writing an energy action plan, tracking their energy use, and developing an energy management strategy.

<https://www.eventbrite.ie/o/sustainable-energy-authority-of-ireland-8264675575>

The SEAI Energy Management Guide for Small Business is a useful guide to getting started with monitoring your energy use.

<https://www.seai.ie/publications/Energy-Management-Workbook-SMEs.pdf>

The Skillnet Ireland Climate Ready Academy Sustainability Pass is a free online self-study modular programme designed to support all staff of all disciplines and skill levels to improve sustainability awareness and encourage best sustainability practices.

<https://www.climate-ready-academy.ie/sustainability-pass/>

The Climate Ready Academy Sustainability Leaders programme aims to drive and assist businesses and Sustainability professionals to embrace responsible and sustainable business practices towards a decarbonised economy.

<https://www.climate-ready-academy.ie/sustainability-leaders-programme/>

SEAI's Energy Academy has modules that will teach you the most effective ways to run behaviour change campaigns in the workplace: <https://www.seai.ie/energyacademy/>

Save up to 10% off your business energy bill by implementing low or no-cost energy efficiency measures. The SEAI have lots of tips and resources to get you started.

<https://www.seai.ie/business-and-public-sector/small-and-medium-business/supports/tips-and-resources/>

Local Enterprise Office Green for Business Programme is available to Small and Micro Enterprises (up to 50 staff). The programme is open to all sectors and provides free expert advice and mentorship and a unique report for your business to understand and plan the next steps in your sustainability journey.

<https://www.localenterprise.ie/green>

4. Implement all no-cost and low-cost energy – saving measures

All Users

Take 'early win' actions on efficiency and cost saving measures first.

The journey to zero emissions will be a demanding one and will likely require strategic investment over time. However, introducing some low-cost energy-saving measures identified through your training can help you make early progress, save your business money and set you on a path to lowering your carbon footprint.

Consider:

- Replacing all old fluorescent or incandescent lighting with high efficiency LED Lighting at end of life, install lighting controls, such as motion detectors, to reduce consumption.
- Ensuring thermostats are set to 19 - 22 degrees C and set timers to turn off on weekends and evenings.
- Installing draught-proofing anywhere that unwanted cold air comes in e.g. under doors, around window frames, through old unused extractor fans.
- Ensuring major energy using equipment such as boilers, compressors, dryers, refrigeration are regularly serviced and maintained to avoid excess consumption.

Review all potential opportunities in [SEAI SME Guide to Energy Efficiency](#)

Supports Available and Description

Replace old fluorescent or incandescent lighting with high efficiency LED Lighting at end of life, install lighting controls such as motion detectors to reduce consumption.

<https://www.seai.ie/publications/SEAI-Energy-Efficient-LED-Lighting-Guide.pdf>

The SBCI Growth and Sustainability Loan Scheme (GSLs) offers discounted finance to SMEs, farmers, fishers and Small Mid-Caps for long-term investments towards climate action and environment sustainability. Lending benefits from reduced interest rates, finance amounts from €25K to €3m over terms from 7 to 10 years, with unsecured loans up to €500K.

<https://sbci.gov.ie/products/growth-and-sustainability-loan-scheme>

The Local Enterprise Office Energy Efficiency Grant helps businesses implement cutting-edge energy-efficient solutions, upgrade equipment, and optimise processes – so to future-proof businesses, reduce costs and help businesses reach their sustainability goals.

The scheme provides 75% of eligible costs (from a minimum grant of €1,000 up to a maximum grant of €10,000) for investment in energy efficient technologies & equipment identified in a Green for Business; GreenStart or SEAI Energy Audit. This includes but is not limited to meters and related installation & commissioning costs, smart energy controls and upgrades or replacement to more energy efficient equipment and systems.

<https://www.localenterprise.ie/energy>

5. Implement Space Heating Measures

All Users

Take additional measures to reduce your heating costs if you have not already done so,

- Insulate your premises so it loses less heat (ensuring adequate ventilation)
- Consider your office layout – where people sit affects how hot or cold they feel.
- Installing recirculating fans (to move hot air that has risen to the roof back down to where it is needed) or lower suspended ceilings (to reduce the amount of space to be heated).
- Installing new windows can reduce heat loss significantly.
- Ensure you have the right type of heating. Spot heating can be more efficient in large spaces with few people.

An investment in energy efficiency – however small – will help drive increased competitiveness and build resilience to the headwinds of market uncertainty and energy price volatility.

Supports Available & Description

More ideas on how to improve heating efficiency are available in SEAI's SME Guide to Energy Efficiency: [SME-Guide-to-Energy-Efficiency](#)

The SBCI Growth and Sustainability Loan Scheme (GSLs) offers discounted finance to SMEs, farmers, fishers and Small Mid-Caps for long-term investments towards climate action and environment sustainability. Lending benefits from reduced interest rates, finance amounts from €25K to €3m over terms from 7 to 10 years, with unsecured loans up to €500K.

<https://sbci.gov.ie/products/growth-and-sustainability-loan-scheme>

6. Engage with your landlord

If the response to: I own my premises = No

Engage early with your landlord or lessor to make necessary changes to energy use, building fabric, lighting and other actions in this plan. If you are considering moving or renting a new premises, make sustainability a key criterion in decision making and in lease negotiations.

You have indicated that you are renting or leasing your premises. While you may therefore be constrained in implementing some of the actions proposed in this plan, many of them are deliverable and commercially sensible, with the engagement of your landlord or lessor. It might also be helpful to engage with other tenants if appropriate.

The Local Enterprise Office Energy Efficiency Grant helps businesses implement cutting-edge energy-efficient solutions, upgrade equipment, and optimise processes – so to future-proof businesses, reduce costs and help businesses reach their sustainability goals.

The scheme provides 75% of eligible costs (from a minimum grant of €1,000 up to a maximum grant of €10,000) for investment in energy efficient technologies & equipment identified in a Green for Business; GreenStart or SEAI Energy Audit. This includes but is not limited to meters and related installation & commissioning costs, smart energy controls and upgrades or replacement to more energy efficient equipment and systems.

<https://www.localenterprise.ie/energy>

7. External expertise to identify energy saving opportunities and plan for zero carbon

Energy Spend (per annum)			
<€10,000	<€10k - €49,999k	€50 - €500k	>€500k
<p>Seek external expertise to help make a plan for a zero-carbon business.</p> <p>Having an external expert examine the energy use and wider operations of your business can help you to plan for further efficiencies and low carbon opportunities.</p> <p><u>Supports Available & Description</u></p> <p>Local Enterprise Office Green for Business Programme is available to Small and Micro Enterprises (up to 50 staff). The programme is open to all sectors and provides free expert advice and mentorship and a unique report for your business to understand and plan the next steps in your sustainability journey. https://www.localenterprise.ie/green</p> <p>Enterprise Ireland and Údarás na Gaeltachta have a range of supports for client companies to reduce emissions and improve environmental performance. https://enterpriseireland.com/en/supports/become-more-sustainable</p>	<p>Seek external expertise to help make a plan for a zero-carbon business.</p> <p>Having an external expert examine the energy use and wider operations of your business can help you to plan for further efficiencies and low carbon opportunities.</p> <p><u>Supports Available & Description</u></p> <p>Local Enterprise Office Green for Business Programme is available to Small and Micro Enterprises (up to 50 staff). --	---	--	--

8. Sector Specific Energy-saving Actions	
- If: Sector Selected	
Other Manufacturing, Food & Drink, Pharmaceuticals, Engineering	Retail
<p>Assess your manufacturing process to ensure it is optimised to use less energy and resources</p> <p>For example, avoid wasting energy when motors are running:</p> <ul style="list-style-type: none"> Automate and interlock motor controls so that they only run when other equipment is switched on and are isolated when it's switched off. Establish optimum settings for motors 	<p>Assess your refrigeration equipment to ensure it is optimised to use less energy and resources</p> <p>Fridges and freezers are very high consumers of energy, so it is important to make sure that they are running at optimal efficiency.</p> <p>Optimum temperatures for fridges range from 1.7 to 3.3 degrees Celsius, and for freezers -18 to -20 degrees Celsius.</p> <p>Ensure freezers are defrosted regularly.</p>

and communicate to staff.

Avoid wasting energy from compressors by ensuring adequate space around compressors and regularly checking for leaks; install automatic isolation valves so that air is not wasted when machines are not in use.

Consider reusing waste heat from compressors. Over 90% of the energy that goes into a compressor comes out as heat – consider using it, for example by fitting a heat exchanger and heating water.

Consider improving motor efficiency: Variable speed drives improve motor efficiency by wasting less energy, increase lifespan of motor and reduce maintenance.

Ensure that you are compliant with refrigerant regulations.

The scheme provides 75% of eligible costs (from a minimum grant of €1,000 up to a maximum grant of €10,000) for investment in energy efficient technologies & equipment identified in a Green for Business; GreenStart

Repair door seals on fridges and relocate refrigeration units if they are located near draughts: poor location can nearly double energy use.

Fit LED lighting. Lighting can add ~10% to the heat load in refrigeration systems. LEDs work very well at low temperatures and give off very little heat, so they are perfect for cooled spaces. They are also very low maintenance, therefore reducing lifetime costs.

Ensure that you are compliant with F-gases regulations if applicable.

10. Undertake an assessment to design a plan to remove fossil fuels from your business operations

- If: metric provided for Coal/ Heating Oil / Heavy Fuel Oil

Make a plan to remove high-carbon fossil fuels from your operations as soon as possible.

You have indicated that you are using a high-carbon fossil fuel in your operations, such as Coal / Oil / LPG / Diesel / Kerosene. This is a concern to the medium-term sustainability of your business and you should plan now to address this. Carbon taxes will make these fuels more expensive for your business in the short term, and SEAI grants will no longer support systems using these fossil fuels. The good news is that you can significantly reduce your carbon footprint and decarbonise your business by addressing this.

You should:

1. Immediately seek an external energy audit and expertise as to the most cost-effective approach to decarbonizing your activities
2. Use this analysis to put together a realistic plan to replace the use of high-carbon fuels in your operations

Supports Available & Description

Local Enterprise Office Green for Business Programme is available to Small and Micro Enterprises (up to 50 staff). The Programme is open to all sectors and provides free expert advice and mentorship and a unique report for your business to understand and plan the next steps in your sustainability journey.

<https://www.localenterprise.ie/green>

Enterprise Ireland and Údarás na Gaeltachta have a range of supports for client companies to reduce emissions and improve environmental performance. The Climate Action Voucher to develop an initial action plan, GreenStart/Plus to develop internal capabilities.

<https://www.enterprise-ireland.com/en/supports/become-more-sustainable>

SEAI's Support Scheme for Energy Audits offers financial support for businesses who want to get a high-quality energy audit. This will identify the most effective actions you can take to reduce your business's fossil fuels use.

[Energy Audits for SMEs | Business | SEAI](#)

Consider if installing renewable heat sources such as a heat pump or biomass boiler under the Support Scheme for Renewable Heat would be appropriate for your facility:

<https://www.seai.ie/business-and-public-sector/business-grants-and-supports/support-scheme-renewable-heat/>

Energy providers (gas, electricity and solid fuel) have an obligation to help customers decarbonise – contact any of the providers (known as Obligated Parties) to assess available support options.

<https://www.seai.ie/business-and-public-sector/business-grants-and-supports/energy-efficiency-obligation-scheme/>

The SEAI EXEED grant scheme supports a range of energy efficiency technologies for organisations who are planning an ambitious energy investment project.

<https://www.seai.ie/business-and-public-sector/business-grants-and-supports/exeed-certified-grant/>

The SBCI Growth and Sustainability Loan Scheme (GSLs) offers discounted finance to SMEs, farmers, fishers and Small Mid-Caps for long-term investments towards climate action and environment sustainability. Lending benefits from reduced interest rates, finance amounts from €25K to €3m over terms from 7 to 10 years, with unsecured loans up to €500K.

12. Monitor your water use and set targets to reduce it.

a. Water use (if not provided, assume low)

Low water use (less than 20,000m3 per annum)

High water use (20,000 m3 per annum and above)

Monitor your water use and set targets to reduce it.

Appoint somebody to review your water bills periodically and introduce additional measures to bring it down each quarter or year. Sign up to Uisce Éireann’s conservation Pledge.

As a first step, highlight water conservation options in bathrooms and kitchen areas.

Water is a precious and non-renewable resource. Ensuring your business uses it efficiently will reduce your water bills and help ensure that you will continue to have a reliable water supply into the future.

Supports Available & Description

The SME Water Stewardship Programme is a free online training initiative, offered in partnership with Uisce Éireann and the Sustainable Enterprise Skillnet, and delivered by 20FIFTY Partners. Accredited by Water Stewardship Ireland, this programme provides international best practice certification and equips businesses with the knowledge to lower water consumption, reduce water bills, and protect the environment.

Your business uses a significant volume of water. It’s essential that you appoint a senior manager to be responsible for monitoring your water use quarterly and setting targets to reduce it.

Designate a Water sustainability lead and support them to become an Uisce Éireann Certified Water Steward. They should be responsible for reviewing your water bills periodically and introduce additional measures to bring it down each quarter or annually. The programme will provide you with the knowledge and skills to reduce water consumption and operating costs at your site.

Businesses can share their new SME Water Steward badge on marketing materials/social media and add it to their green credentials.

Water is a precious and non-renewable resource. Ensuring your business uses it efficiently will reduce your water bills and help ensure that you will continue to have a reliable water supply into the future.

13. Support staff to use active travel in their commute and work, facilitate, remote and/or flexible work.

All Users

Support all staff to adopt more sustainable commutes and work options.

Supporting staff to walk, cycle, use public transport or carpool in their commute will contribute to staff wellbeing as well as reducing transport-related emissions. Install bike racks for staff and customers.

Introduce a remote work/ flexible work policy. Allow more staff to remote work, which will reduce transport-related emissions associated with your business and give staff additional flexibility to manage their work/life balance.

Utilise remote meeting capabilities where possible instead of travelling for meetings and conferences.

Supports Available & Description

Offer employees the bike to work scheme <https://www.biketowork.ie/>

Offer staff that commute via public transport the tax saver scheme www.taxesaver.ie

Use the Government's Remote Working guidance and business checklist to develop a remote working policy for employees where applicable.

<https://enterprise.gov.ie/en/What-We-Do/Workplace-and-Skills/Remote-Working/>

<https://enterprise.gov.ie/en/Publications/Remote-Working-Checklist-for-Employers.html>

Larger businesses, or groups of businesses (for example, in business parks) should consider creating a Smarter Travel Workplaces plan, with resources and guidance available from the National Transport Authority.

b. HGV Action If: Metrics for vehicle fuels are provided AND Sector is Freight, Manufacturing, Food & Drink, Pharmaceuticals, Engineering

Make a plan to reduce the environmental impacts of your transport operations and determine when and how to convert trucks, lorries or other heavy-duty vehicles to low carbon fuels. To date, in Ireland, the transport sector is heavily dependent on imported oil. Reducing this reliance and switching to alternative fuels and technologies will be essential to decarbonise the sector. Major changes to our conventional fuel choices will be needed to achieve this goal. Calculating and reporting the greenhouse gas emissions of your transport operations will inform sustainable transportation decisions and supply chain optimization.

Supports Available & Description

The Alternatively Fueled Heavy Duty Vehicle Purchase Grant Scheme delivered through Transport Infrastructure Ireland awards grants to assist companies and enterprises who wish to buy new alternatively fueled heavy-duty vehicles supported by the Scheme (AFHDVs) as opposed to the diesel equivalent. Grant amounts are calculated as a percentage of the difference in price between an AFHDV and its diesel equivalent. Supported fuel-types include CNG, LNG and electric.

<https://www.tii.ie/roads-tolling/tolling-information/afhdv-scheme/>

Enterprise Ireland, Údarás na Gaeltachta & IDA's GreenStart and GreenPlus grants can support client companies with training and advice to measurably reduce greenhouse gas emissions and air pollutants & improve fuel efficiency based on GlobalLogistics Emissions Council (GLEC) framework or similar. Scope may include all modes (road, rail, sea, air), sub-suppliers, city and reverse logistics, and their internal and external impacts.

<https://www.enterprise-ireland.com/en/supports/become-more-sustainable>

and

IDA Ireland supporting you Green Goals. How IDA helps clients to explore sustainable opportunities. The following supports are available to IDA clients only.

Packaging waste generally represents a large percentage of most business's</p>

represents a large percentage of most business's total waste, so it is important to assess your packaging design, or to consult with suppliers to reduce the amount of packaging and to ensure all packaging is recyclable. Consider if it is possible for deliveries to be supplied in reusable crates or other forms of packaging that can be re-used or sent back to suppliers. The more packaging you can reduce or reuse, the greater the savings in waste management costs for you and your customers.

Supports Available & Description

Consult with your supplier to see if there is any way they can reduce the amount of packaging supplies are delivered in and to ensure all packaging is recyclable. Ask if it is possible for deliveries to be supplied in reusable crates or other forms of packaging that can be sent back to the supplier.
